School Program Recommendation

I would like to recommend the new Healthy Habits School Program, sponsored by Dettol.

As parents, we want our children to enjoy a positive learning experience at school and be confident that they understand the importance of correct hand hygiene and cleanliness.

That’s why I’m pleased to share with you the Healthy Habits School Program. Healthy Habits is a free initiative, sponsored by Dettol, developed in partnership with educational professionals to provide primary school teachers with engaging lesson plans and activities to help students stay happy and healthy.

The Program includes a range of curriculum-aligned educational resources for years K-6, with a particular emphasis on the topics of understanding germs, cleanliness, healthy eating and exercise. The Program is further supported with interactive whiteboard activities and experiments, classroom posters and star charts to help bring the learnings to life in the classroom.

How to Register?

- Simply visit www.dettol.com.au/healthyhabits
- Call 1300 781 795 to talk to a Healthy Habits representative
- Or Email the Program, healthyhabits@tdirections.com.au

We hope together we can encourage healthy life-long habits in our children.
